

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Walworth Waterworks Failed to Comply With a Testing Procedure

Our water system Walworth Waterworks recently failed to comply with a required testing procedure. Even though this was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct the situation.

**We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2021 lead and copper sampling event we sampled 10 sites and 3 were not correct sample sites, and therefore cannot be sure of the quality of your drinking water during that time.*

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What is being done?

We are working with the DNR and EPA to gather corrected sampling sites and retest.

For more information, please contact Mathew Nickels at 1-262-275-6648.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Walworth waterworks. PSWID# 26501497.
